UNITED STATES DISTRICT COURT
WESTERN DISTRICT OF WASHINGTON
AT SEATTLE

UNITED STATES OF AMERICA, on
its own behalf and as trustee
on behalf of the Lummi Nation,

Plaintiffs,

v.

KEITH E. MILNER and SHIRLEY A.
MILNER, et al.,

Defendants,

THE LUMMI NATION,

Intervenor-Plaintiff.

NO. C01-809R

ORDER GRANTING PLAINTIFFS'
MOTIONS FOR SUMMARY JUDGMENT
RE: TRESPASS AND RHA CLAIMS

THIS MATTER comes before the court on Plaintiffs' motions
for summary judgment. Having reviewed the pleadings filed in
support of and in opposition to these motions, the court finds
and rules as follows:

I. BACKGROUND

Defendants Keith E. and Shirley A. Milner, Mary D. Sharp,
Brent C. and Mary K. Nicholson, and Ian C. and Marcia A. Boyd own
beachfront property on Sandy Point, in Whatcom County, Washing-

Handwritten signature/initials

1 ton.¹ Defendants' property is fronted by various shore defense
2 structures that allegedly encroach on tidelands on the Strait of
3 Georgia that are owned by the United States in trust for the
4 Lummi Nation. The United States also alleges that these struc-
5 tures are being maintained in violation of the Rivers and Harbors
6 Act ("RHA").² Together, the United States and Lummi Nation move
7 for summary judgment on the trespass claim. The United States
8 moves separately for summary judgment on its RHA claim.

10 II. DISCUSSION

11 A. Summary judgment standard

12 Summary judgment is appropriate when "the pleadings . . .
13 show that there is no genuine issue as to any material fact and
14 that the moving party is entitled to judgment as a matter of
15 law." Fed. R. Civ. P. 56(c); Celotex Corp. v. Catrett, 477 U.S.
16 317, 322 (1986). While the moving party has the initial burden
17 to establish the absence of any genuine issues of fact, the
18 nonmoving party "must do more than simply show that there is some
19 metaphysical doubt as to the material facts." Matsushita Elec.
20 Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 586 (1986).

21
22 ¹ Defendants Harry F. Case and Donald C. and Gloria Walker
23 are not involved in this motion as they have reached a settlement
24 in principle with the government. That settlement, however, has
25 not yet been approved by the Assistant Attorney General.
26 Consequently, the United States reserves the right to move
against these defendants in the future.

² A third cause of action under the Clean Water Act is not
at issue in these motions.

1 Rather, the nonmoving party must respond by "set[ting] forth
2 specific facts showing that there is a genuine issue for trial."
3 Fed. R. Civ. P. 56(c). "Where the record as a whole could not
4 lead a rational trier of fact to find for the non-moving party,
5 there is no genuine issue for trial." Matsushita Elec., 475 U.S.
6 at 587.

7 B. Liability for trespass

8 The parties agree that the federal law of trespass applies
9 in this case. See United States v. Pend Oreille Pub. Util. Dist.
10 No. 1, 28 F.3d 1544, 1550 n.8 (9th Cir. 1994) (federal law
11 applies to trespass cause of action protecting Indian lands);
12 Oneida County v. Oneida Indian Nation, 470 U.S. 226, 236 (1985).
13 That law generally comports to the Restatement of Torts. See
14 United States v. West, 232 F.2d 694, 699 (9th Cir. 1956) (adopt-
15 ing Restatement (First) of Torts for operative definition of
16 federal trespass); U.S. v. Osterlund, 505 F. Supp. 165, 167
17 (D.C. Colo. 1981). Under the Restatement, a person trespasses
18 when he "intentionally . . . causes a thing [to enter another's
19 land] . . . remains on the land or . . . fails to remove from the
20 land a thing which he is under a duty to remove." Restatement
21 (Second) of Torts § 158.

22 In the present case, uncontested topographic maps demon-
23 strate that as of January 2002, portions of Defendants' shore
24 defense structures were seaward of the line of mean high water,
25 which this court has determined to be Defendants' boundary line.
26 Ex. 1, United States Mot. Summ. J.; Order Granting United States'

ORDER

Page - 3 -

Instead, Defendants attempt to persuade the court that they cannot be held liable for trespass because they never intended their shore defense structures to encroach onto the tidelands.⁴ According to Defendants, the ambulatory nature of the boundary was the cause of the trespass. Defendants liken their situation

' Defendants have failed to persuade the court with this argument on at least two previous occasions.

ORDER
Page - 4 -

1 to the party in a Restatement illustration who piles logs on his
2 land by the side of a stream well above the high-water mark,
3 which are subsequently carried away by an unprecedented freshet.
4 In the illustration, that party is not liable to a party down-
5 stream on whose lands the logs are deposited. Restatement
6 (Second) of Torts § 166 ill. 3. According to Defendants, all of
7 their shore defense structures were originally placed on their
8 own property with subsequent natural events creating the tres-
9 pass.

10 Defendants, however, overlook the fact that to be liable,
11 they need not have necessarily intended the actual trespass but
12 that it is enough that they (or their predecessors⁵) acted with
13 knowledge that constructing the shore defense structures would,
14 with substantial certainty, result in entry of portions of the
15 structures onto the tidelands. Id. § 158 cmt. 1. In the present
16 case, as littoral owners, Defendants took their property "with
17 the knowledge that the boundary may change by accretion or
18 reliction." Michaelson v. Silver Beach Improvement Ass'n, 173
19 N.E.2d 273, 278 (Mass. 1961). Defendants, therefore, are more
20 like "one who so piles sand close to his boundary that by force
21 of gravity alone it slides down onto his neighbor's land, or who
22 so builds an embankment that during ordinary rainfalls the dirt

24 ⁵ The Defendants are liable for trespass even in the case
25 where their predecessors tortiously placed the structures and the
26 Defendants fail to remove them. Restatement (Second) of Torts
§ 161(2).

1 from it is washed upon adjacent lands," Restatement (Second) of
2 Torts § 158 cmt. 1, than they are like one who piles logs in the
3 face of an unprecedented freshet.⁶

4 Defendants also overlook the fact that they have failed to
5 remove the encroaching parts of the shore defense structures even
6 after the government requested them to do so. In such a situa-
7 tion, the intention element is satisfied. New York State Energy
8 Research and Dev. Auth. v. Nuclear Fuel Servs., Inc., 561 F.
9 Supp. 954, 974 (W.D.N.Y. 1983) ("In the case of trespass through
10 the continuing presence of chattels on another's land, the
11 requisite intent does not arise until the duty to remove the
12 chattels arises, which does not occur until a demand for removal
13 has been made."). Accordingly, Defendants are liable for tres-
14 pass.

15
16 ⁶ Defendants contend that they are not liable for trespass
17 under the common enemy doctrine. Under that doctrine, a
18 landowner is entitled to build structures to repel the erosive
19 effects of water. A landowner who builds such structures is
20 generally not held liable for trespass when the consequences and
21 effects of those structures injure another's property. That is
22 not the case at bar, however, because Defendants' shore defense
23 structures themselves are physically located on the government's
24 property. Under the common enemy doctrine, a landowner is simply
25 not entitled to enter onto another's land in order to build or
26 maintain his defensive structures.

Similarly, the cases that Defendants amass for the
proposition that there can be no trespass when acts taken on
one's own property cause unintended harm to another's property
are inapposite. See Cannon v. Dunn, 700 P.2d 502 (Ariz. 1985);
Hicks v. Drew, 49 P. 189 (Cal. 1897); Schulze v. Monsanto Co.,
782 S.W.2d 419 (Mo. App. 1989). As above, none of these cases
sanction an actual physical encroachment but rather only consider
a "constructive" trespass whereby affects and consequences cause
injury to land.

ORDER

Page - 6 -

1 C. Liability under RHA

2 Section 10 of the RHA makes it unlawful "to build or com-
3 mence the building of any . . . breakwater, bulkhead . . . or
4 other structures in any . . . water of the United States . . .
5 except on plans recommended by the Chief of Engineers and autho-
6 rized by the Secretary of the Army." Section 10 also makes it
7 unlawful "to excavate or fill, or in any manner to alter or
8 modify the course, location, condition, or capacity of . . . the
9 channel of any navigable water of the United States, unless the
10 work has been recommended by the Chief of Engineers and autho-
11 rized by the Secretary of the Army prior to beginning the same."
12 33 U.S.C. § 403.

13 Courts have interpreted Section 10 to also make unlawful the
14 maintenance of structures restricted by the Act.⁷ United States

15 _____
16 ⁷ Defendants contend that they cannot be liable under the
17 RHA because they did not intend to obstruct any navigable water
18 or build any structure in a navigable water. Their citation to
19 U.S. v. Ohio Barge Lines, Inc., 607 F.2d 624 (3d Cir. 1979) and
20 United States v. Bigan, 274 F.2d 729 (3d Cir. 1960) for the
21 proposition that the RHA requires some intent and active
22 contribution to the erection of the obstruction is unpersuasive
23 in light of recent Ninth Circuit case law.

24 A similar argument to Defendants was rejected by the court
25 in United States v. Alleyne, 454 F. Supp. 1164 (D.C.N.Y. 1978).
26 In that case, the court clarified the nature of the "intent"
needed to be liable under Section 10. According to the court,
"it is [not] necessary that the purpose be to create an
obstruction, but that such a result is reasonably to be
apprehended from the acts actually intended wholly irrespective
of whether or not there was a design to create an obstruction to
navigation." 454 F. Supp. at 1171 (quoting United States v.
Bridgeport Towing Line, Inc., 15 F.2d 240, 241 (D. Conn. 1926).
Consequently, all that is necessary is that the obstruction to
navigation be "reasonably foreseeable." Id. In the present

ORDER

Page - 7 -

1 v. Alameda Gateway, Ltd., 953 F. Supp. 1106, 1110 (N.D. Cal.
2 1996) ("To deem the RHA inapplicable to pre-existing structures
3 would sharply restrict the ability of the government to preserve
4 the public interest in maintaining unimpeded access to the
5 navigable waters of the United States."); see also United States
6 v. Alameda Gateway, Ltd., 213 F.3d 1161, 1167 (9th Cir. 2000)
7 (holding that the RHA allows the United States to remove struc-
8 tures that were once erected lawfully but subsequently found to
9 be obstructions). Given that Defendants are maintaining the
10 structures (i.e. they have not removed them), they are liable
11 under the RHA for those parts of the structures that are below
12 MHW. See Leslie Salt Co. v. Froehlke, 578 F.2d 742, 753 (9th
13 Cir. 1978) (holding that "in tidal areas, 'navigable waters of
14 the United States,' as used in the Rivers and Harbors Act, extend
15 to all places covered by the ebb and flow of the tide to the mean
16 high water (MHW) mark in its unobstructed, natural state").
17 Furthermore, the structures also modify the course, location, and
18 condition of a navigable water.

19 As demonstrated by the topographic maps submitted by the
20 government, as of January 2002, parts of Defendants' shore
21 defense structures lie seaward of MHW in its natural and unob-
22 structed state. Consequently, the Defendants are liable for
23
24

25 case, it was reasonably foreseeable that erosion would one day
26 impact the shore defense structures so that they would be located
seaward of MHW and be considered obstructions to navigation.

ORDER

Page - 8 -

1 violations of the RHA.⁸

2 D. Remedy

3 Plaintiffs seek an injunction against Defendants to remove
4 any part of the shore defense structures that lie below MHW,
5 having waived damages. Such an injunction is available for both
6 the trespass and the RHA violation. 33 U.S.C. § 406 (injunction
7 available to remove structures erected in violation of Section 10
8 of the RHA).

9 Defendants urge that any injunction from this court be only
10 for them to apply for after-the-fact permits for the shore
11 defense structures. Despite having some flexibility in shaping
12 the scope of relief, United States v. Illinois Terminal R.R. Co.,
13 501 F. Supp. 18, 21 (E.D. Mo. 1980) ("The federal courts have not
14 limited enforcement of the River and Harbor Appropriation Act to
15

16 ⁸ Defendants misread Section 10 to require a showing that
17 the shore defense structures actually obstruct the navigable
18 capacity of the Strait of Georgia. Instead, the structures
19 listed in the second and third clauses of Section 10 (i.e.
20 bulkheads, breakwaters, and other structures) "are presumed to be
21 obstructions to navigable capacity When one undertakes
22 any of the activities described in clause 2 or by his activities
23 brings about any of the results specified in clause 3, he
24 violates Section 10 if he has not first sought and obtained a
25 permit from the Corps of Engineers." Sierra Club v. Andrus, 610
26 F.2d 581, 594-95 (9th Cir. 1979), rev'd on other grounds sub nom.
California v. Sierra Club, 451 U.S. 287 (1981). "[T]o fall
within the prohibition of clause 2, it need only be shown that
the subject in question is one of those enumerated in Section
10." United States v. Boyden, 696 F.2d 685, 688 (9th Cir. 1983);
see also United States v. Joseph G. Moretti, Inc., 478 F.2d 418,
429 (5th Cir. 1973) ("any argument that the filling of navigable
waters does not reduce navigable capacity of the filled waterway
and thereby constitute an obstruction within the meaning of § 403
borders on the frivolous.").

ORDER

Page - 9 -

1 the criminal and injunctive remedies provided in § 406. . . .
2 Congress . . . has provided enough federal law in (33 U.S.C.
3 § 403) from which appropriate remedies may be fashioned even
4 though they rest on inferences."),⁹ the court declines to issue
5 such an injunction. First, such an injunction would not remedy
6 the trespass. Second, regulations authorizing such after-the-
7 fact permits were rescinded by the Corps in 1977. 42 Fed. Reg.
8 37,122, 37,133 (July 19, 1977) (repealing 33 C.F.R. § 209.120,
9 which included a provision, Section 209.120(c)(iv), for granting
10 after-the-fact permits). Accordingly, if the court issues an
11 injunction, it must be for the removal of the shore defense
12 structures.

13 Under the RHA, to obtain an injunction, the government need
14 not show irreparable injury and the court need not balance any
15 interests. United States v. Stoeco Homes, Inc., 498 F.2d 597,
16 611 (3d Cir. 1974) ("No balancing of interest or need to show
17 irreparable injury is required when an injunction is sought under
18 § 12 to prevent erection or seek removal of an unlawful struc-
19 ture.") (dicta); United States v. Ciampitti, 583 F. Supp. 483,
20 498 (D.N.J. 1984) (citing Stoeco Homes); United States v.
21 Alleyne, 454 F. Supp. 1164, 1170 (D.C.N.Y. 1978); United States
22

23 ⁹ That flexibility is limited, however, to seeking only
24 criminal penalties or some form of an injunction as "the Corps
25 does not have the authority to compensate parties injured
26 by . . . illegal activities." Potomac River Ass'n, Inc. v.
Lundeberg Maryland Seamanship School, Inc., 402 F. Supp. 344, 357
(D. Md. 1975).

1 v. Underwood, 344 F. Supp. 486, 494 (D.C. Fla. 1972). Conse-
2 quently, the only remaining equitable considerations in issuing
3 an injunction are (1) the nature of the interest to be protected,
4 (2) any unreasonable delay in initiating the action, (3) any
5 related misconduct on the government's part, and (4) the practi-
6 cability of framing and enforcing the injunction. Restatement
7 (Second) Torts § 936(1); see also United States v. Sexton Cove
8 Estates, Inc., 526 F.2d 1293, 1301 (5th Cir. 1976) ("The degree
9 and kind of wrong and the practicality of the remedy must be
10 considered in the formulation of that remedy.").¹⁰

11 In the present case, it is largely undisputed that the shore
12 defense structures have negative environmental consequences.
13 Johannessen Decl., Gov't Ex. 12 at 86:18-87:8 (negative effects
14 of Defendants' shore defense structures include increased scour-
15 ing of the beach in front of the structures, increased wave
16 turbulence, a coarsening of the beach that tends to displace
17 potential surf smelt spawning areas, and reducing sediment
18 downdrift that nourishes beach habitats to the south of the
19 structures). In light of the violation of the RHA, an injunction
20 to remove the structures seaward of MHW is appropriate.¹¹ As the
21

22 ¹⁰ The court finds that there was no unreasonable delay by
23 the government. Nor has the government engaged in any related
misconduct.

24 ¹¹ In fashioning the remedy, the court finds United States
25 v. Sunset Cove, Inc., 514 F.2d 1089 (9th Cir. 1975), instructive.
26 In that case, a developer constructed riprap below MHW in
violation of 33 U.S.C. § 403 along a shoreline with an ambulatory
boundary. The developer, much like the Defendants in the present

1 trespass claim is coextensive with the RHA claim, an injunction
2 under Section 406 makes unnecessary a remedy for the trespass
3 claim given the government's waiver of all damages.

4
5 III. CONCLUSION

6 For the foregoing reasons, Plaintiffs' motions for summary
7 judgment [docket no. 224-1 & 231-1] are GRANTED. It is hereby
8 adjudged and ORDERED that:

9 (1) Defendants shall promptly remove all rock, riprap, and
10 other shore defense structures that are located seaward
11 of MHW as that line is determined on the government's
12 January 2002 survey. Such removal shall be supervised
13 by the Chief of Engineers of the Army Corps of Engi-
14 neers or his designee.

15 (2) As MHW moves up and down the shore, Defendants shall
16 promptly, at the request of the government, remove all
17 rock, riprap, and other shore defense structures that
18 become located seaward of MHW, as that point is deter-
19 mined by subsequent surveys. Such removal shall be
20 supervised by the Chief of Engineers of the Army Corps

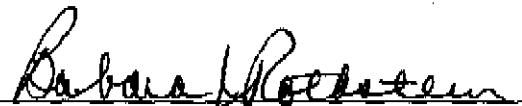

21
22 case, installed the riprap to protect against erosion. The
23 district court, having found a violation of Section 403, issued
24 an injunction for the developer to remove all of the fill. In
25 affirming the injunction, the Ninth Circuit modified it so that
26 the defendants would only have to remove enough riprap to "permit
nature, in a reasonable period of time, to take its course and
approximately re-establish former topographic conditions." 514
F.2d at 1090.

1 of Engineers or his designee.

2 (3) The government shall pay for any future survey estab-
3 lishing MHW for the purposes of this order. If such
4 survey reveals that certain structures are located
5 seaward of MHW, any defendant whose property is fronted
6 by those structures shall jointly and severally compen-
7 sate the United States for the cost of that survey.

8 (4) At anytime, the government can remove any structures
9 located seaward of MHW and obtain joint and several
10 compensation from the Defendants whose property is
11 fronted by the offending structures.

12 DATED at Seattle, Washington this 16th day of June, 2003.
